Summary

- Graduate with a Ph.D. degree expected in Sep 2024, proactively pursuing roles that offer dynamic challenges and focus on the practical application of advanced machine and deep learning technologies
- Proficient in designing and implementing cutting-edge **machine learning** and **AI** solutions, espeically for a spectrum of **imaging and vision** challenges, including image processing, enhancement, restoration, and segmentation
- 6 years of dedicated research in the realm of **computational imaging**, speicalizing in **computational microscopy**, with a focus on solving intricate **inverse problems** across diverse imaging modalities
- **16** research articles published on peer-reviewed journals, with first authorship in most, accumulating ∼**300** citations

Education

University of California, Los Angeles| Ph.D., Electrical and Computer Engineering   Sep 2019 - Present
- GPA: 3.96/4
- Received UCLA **Dissertation Year Fellowship** and **Amazon Fellowship**

Zhejiang University| BEng, Optical Science and Engineering, Statistics   Sep 2015 - Jun 2019
- GPA: 3.96/4
- Received **National Scholarship** twice and Zhejiang University **Special Scholarship**

Projects (Selected)

Self-supervised learning based on physical laws and thought experiments (GedankenNet)   Feb 2022 - Aug 2023
- Developed a novel **self-supervised** neural network using physics-informed learning and **pure artificial data** (thought experiments), showing superior performance and generalization than supervised models
- Addressed the reliance of supervised learning on large-scale, high-quality labels and their limited generalization

Cycle-consistency uncertainty quantification of neural networks on inverse problems   Dec 2022 - Oct 2023
- Built novel **uncertainty quantification** for neural networks on inverse problems using forward-backward cycles
- Developed machine learning algorithms to detect **corrupted** and **out-of-distribution** data based on cycle consistency

Fourier Imager Network with superior external generalization (FIN)   Aug 2021 - Apr 2022
- Developed FIN, a novel neural network utilizing **global spatial-frequency** information in spatial and Fourier domains, showing superior **external generalization** on unseen distributions
- Enhanced FIN with dynamic network modules (eFIN), showcasing its versatility in multiple image restoration tasks

Recurrent neural network (RNN)-based high-dimensional imaging   Jun 2020 - Jul 2022
- Developed a RNN-based **high-dimensional image reconstruction** approach using sparse sequential low-dimensional measurements, and validated it on various high-dimensional microscopy image reconstruction tasks

Single-shot autofocusing of microscopy image using deep learning (Deep-R)   Sep 2019 - Jan 2021
- Developed Deep-R for **offline autofocusing** of microscopy images without the prior knowledge or measurement of the system point spread function (PSF)

OCT angiography enabled by statistical characterization of intensity and decorrelation   Jun 2018 - Apr 2019
- Developed a statistical learning algorithm for OCT angiography using the decorrelation and intensity of blood flow signal
- Derived a **multi-variate time-series** model to characterize and distinguish OCT signals of dynamic and static regions

Career Experience

Autowise.ai   Shanghai, China
Software R&D Engineer Intern   Feb 2019 - Jun 2019
- Participate in establishing **LiDAR** calibration models under various weather conditions
- Implement **3D point cloud**-based **object detection and segmentation**

Technical Skills

Programming	Python (PyTorch, Tensorflow, JAX), R, MATLAB
Frameworks & Tools	Zemax, Unity

Professional Service

- Served as reviewers for top peer-reviewed journals including IEEE Transactions on Medical Imaging, Biomedical Optics Express, Optics Express, etc.
- Reviewed more than **10** research articles.
- Mentored more than **10** undergrad and master students and supervised them conducting research projects in UCLA.
- Served as grader for multiple undergrad- and graduate-level courses in UCLA.

CONFERENCE PUBLICATIONS (SELECTED)

1. **L. Huang**, H. Chen, T. Liu, and A. Ozcan, "Self-supervised, physics-informed learning for hologram reconstruction" in SPIE Photonics West 2024 (AI/ML **Best Paper**)

2. **L. Huang**, H. Chen, T. Liu, and A. Ozcan, "Self-supervised neural network for holographic microscopy (invited)," in Conference on Lasers and Electro-Optics, Technical Digest Series, Technical Digest Series (Optica Publishing Group, 2023), paper ATu3Q.4

3. **L. Huang**, X. Yang, T. Liu, A. Ozcan, "Few-shot generalizable hologram reconstruction model using a recurrent neural network (RNN) (Conference Presentation)," Proc. SPIE PC12204, Emerging Topics in Artificial Intelligence (ETAI) 2022, PC122040H (4 October 2022)

4. **L. Huang**, T. Liu, X. Yang, Y. Luo, Y. Rivenson, and A. Ozcan, "Phase Recovery and Holographic Imaging using Recurrent Neural Networks (RNNs)," in Conference on Lasers and Electro-Optics, Technical Digest Series (Optica Publishing Group, 2022), paper ATh1D.5

5. **L. Huang**, T. Liu, X. Yang, Y. Luo, Y. Rivenson, A. Ozcan, "Holographic image reconstruction with phase recovery and autofocusing using recurrent neural networks," Proc. SPIE 11970, Quantitative Phase Imaging VIII, 119700C (2 March 2022)

ACHIEVEMENTS & AWARDS

- UCLA Dissertation Year Fellowship
- Amazon Doctoral Student Fellowship
- UCLA ECE Department Fellowship
- Zhejiang University Special Scholarship (Supreme award for Undergraduates)
- Zhejiang University Chu Kochen College Innovation Scholarship
- National Scholarship ($\times 2$)
- MATLAB Innovation Prize (Special Prize) in China Undergraduate Mathematical Contest in Modeling
